Homework lecture 8

1. Make an application for demonstrating at least 3 cocoa pods selected by you. The app must have a table view with custom table view cells that consist of round cocoa pod image (chosen by you), name of the cocoa pod, link to the cocoa pod and a favorite button with icon of star. When the cocoa pod is favorite , the cocoa pod image must have a border with gold color and border width equal to 4 px, else there must be no border. When the cell is clicked it leads to the following cocoa pod demonstration.

Bonus task 1:
Make the border width to be equal to 10% of the height of the cell
Bonus task 2:
Use a cocoa pod button for a favorite icon and find a way to implement a delegate to pass information to the TVC with 3rd party framework.
Bonus task 3:
Make the cocoa pod images be loaded from the internet. Use UIImage constructor implementation to find how.
